# TOXIC FREE RADICALS

## 有毒的自由基

**20 Healthy volunteers, 20-40 yrs**

20名健康志愿者，年龄介于20 - 40岁

**Risk factors** 风险因素:

- **Smoke 10+ cigarettes/day** 抽烟 每天超过10根香烟

- **Drink 30+ g alcohol/day (equivalent to 600cc of Taiwan Beer, 250cc of red wine, and 75cc of XO)** 喝酒 每天超过30克酒精 (相等于600cc台湾啤酒, 250毫升红葡萄酒或75CC的XO)

**Take Maqui Plus 4 shots(100ml)/day, for 3 months**

**(2 shots (50ml) /meal, morning & evening)**

**连续3个月，每天摄取MaquiPlus+ 2小杯**

Tested by antioxidant experts at Department of Recreation Sport & Health Promotion, National Pingtung University of Science & Technology, Taiwan.

# Liver Protection

Increase  
Liver Protection

+14%  
in 3 months

0 mth

3  
mth

- Liver protection improved after drinking Maqui Plus 4shots (100ml) daily for 1mth, and increased 14% after 3 mth.
- Tested in 20volunteers, 20-40 yrs, with risk factors for liver damage: smoke >10cigarettes/d, drink alcohol >30g/d (Beer 600ml, red wine 250ml, XO 75ml). After drinking Maqui Plus 2 shots/d (50ml), blood samples were tested after exercised to stress the body.
- Liver injury-induced enzymes, SGPT&SGOT, started to reduce after 1m, and SGPT reduced upto 14% after 3m. indicating improving liver protection against free radicals. In addition SGOT

# Reduce Toxin in Blood

% Toxin (MDA) in blood due to cell & tissue damages

**-51%** in 3 mth  
**Reduce Toxin in Blood**

• Tested in 20 volunteers, 20-40 yrs with risk factors for liver damage (smoke >10cigarettes/d, drink alcohol >30g/d (Beer 600ml, red wine 250ml, XO 75ml). After drinking Maqui Plus 4shots (100ml) daily, blood samples were tested for MDA (Malondialdehyde), a toxin from cells & tissues damages due to free radicals.

• Maximum reduction of MDA toxin was 36% after 1m, and upto 51% after 3 m of Maqui Plus ingestion, indicating improving cells, tissues, and liver protection against damages.

# Increase Natural Antioxidants in the Body Both Type and Level

Complete Cell Protection both "inside" and "outside"

**Increase**  
 SOD enzyme  
 Protect  
 "externally"

**Increase**  
 GSH tripeptide  
 Protect  
 "cells" and "Liver" internally

% Increase in Natural Antioxidants in the body

• Tested in 20 volunteers, 20-40 yrs, with risk factors for liver damage: smoke >10 cigarettes/d, drink alcohol >30g/d (beer 600ml, red wine 250ml, XO 75ml). After drinking Maqui Plus 4shots (100ml) daily, blood samples were tested.  
 • Maximum increase of natural antioxidants levels in the body were found both for "antioxidant enzyme, SOD (Superoxide dismutase)" found mainly in the extracellular matrix of tissues (127% in 1m, 255% in 3m), and for "antioxidant peptide, GSH (Glutathione)" found intracellularly especially in liver cells (205% in 1m, 246% in 3m).
