

YOUR GUIDE TO UNIVERSITY COSTS

including tuition fees & living cost

For most parents, funding for a child's education is the largest expenditure they make next to buying a home. And due to the credit crunch, it has never been more important to know how to finance your children's studies at university. The costs of studying for a degree are rising and the risk of not keeping a careful check on your financial situation can lead to large debts that can take years to pay off.

There are several aspects that you need to consider when preparing an education plan. For instance, tuition fees for universities abroad are normally higher than that of local universities and may vary according to programme or course. The difference in education costs may also depend on the number of years to complete the respective courses. Furthermore, you need to take into account the effects of rising inflation on tuition fees as well as other key expenses such as living expenses, course materials and transportation costs.

The university tuition fees and living costs reported here with the Education Planning Needs Analysis will help parents prepare an estimate with projected inflation. It will also provide parents an idea as to how much time they need to accumulate the desired amount. While no one really knows what future university pricing patterns will be like, we do know for a fact that families who plan ahead will be in a better position to handle the unexpected.

It is our fervent hope that all parents who refer to this handy guide will come away with a better picture and know-how in preparing for their children's future education.

Happy Planning!

3 + 0 DEGREE PROGRAMMES (Offered by Private Higher Educational Institutions)

3+0 Overseas – these are overseas degree programmes allowed by foreign partner universities for Malaysian private higher educational institutions to conduct the entire degree programmes in Malaysia. The foreign partner universities will then award the degree qualification.

The general entry requirement for admission into Bachelor degree programmes is pre-university qualification such as STPM, A-Level, etc.
